# DRAFT PROGRAMME

Regional dynamics within and across the Eastern frontiers of Europe have undergone a succession of path-breaking transformations since the invasion of Ukraine. These range from increasingly overt support to the Ukrainian war effort to decoupling from the Russian economy and an unprecedented boost to the expansion of the European Union's security architecture. The inflow of millions of Ukrainian exiles into Eastern Europe has also and simultaneously triggered the de facto transformation of their past disregard for immigration. While the EC and member-states have formally agreed to fast track the opening of negotiations towards a full membership of Ukraine and Moldova. The war in Ukraine represents in this respect a particular set of challenges to processes of (de)bordering in the EU and their conceptualization. By contrast, yet closely related, Vladimir Putin's invasion of Ukraine has combined unyielding disregard for international law, with commitment to patterns of regional integration that, while formally aspiring to be the nemesis of the EU, remain evocative of the governance and mental maps associated with the coercive (hub and spoke driven) integration practiced within colonial federations or, more specifically, within the Russian empire and, subsequently, the Soviet Union.
